James Cordier (Tampa Bay, FL, and Chicago, IL) is founder and head trader of OptionSellers.com, the first investment firm in the U.S. to specialize exclusively in managed option selling portfolios for high net worth investors. Michael Gross (Tampa Bay, FL) is director of research at OptionSellers.com and works directly with many of the firm's clients in planning portfolio strategy.

This is the kind of book you need to read and reread. I am determined to learn how to sell options with this as my guide.

very helpful book, for me; who just started to learn option selling

Totally worth reading for every new option trader

Excellent book on futures options trading and trading options in general. Very user friendly and professionally explained. Compares stock option selling with future options selling.

This book is the best and most complete futures book out there period! Mr Cordier and Mr Gross are pioneers in their field and took many years of trial and error and condensed it into an easy to follow guide for option selling success. Anyone interested in trading should read this book first and follow every rule.

If you are questioning whether option selling is for you? This book will answer that question. Well written and informative. Great start to develop your plan. There is a small amount of sales pitch for their services, if you can ignore and press on, the information is worth the price.

This book provide a different perspective to speculating/investing. It hit me straight that I do not know when to sell most of the time whether in profit or loss. This way of investing just forcing you to take or drop and go...

I'm reading this book and taking his techniques and paper trading with them. So far, the author seems to be on track and my paper trades are profitable.
