Helicopters: Military (Aviation Factfile (Chartwell Books))

Synopsis

This is a fascinating and informative guide to more than 120 of the most important rotorcraft ever designed. Its information packed pages cover a broad range of helicopters, from early experimental autogyros and basic designs like the Sikorsky R-4 to all time classics like the Bell UH-1, the famous "Huey" that became the workhorse of the Vietnam War. Each helicopter is covered in detail, with feature boxes outlining its development, technical specifications, performance data, and variants. Unique graphics allow you to compare specific features like top speed, troop-carrying capacity, and payload to those of other aircraft of the same type. With a wealth of essential information on every page, this book is a must have for aircraft lovers of all ages. Contains over 2000 color and black-and-white photographs and illustrations. Includes full dimensions, weights, performance, and armament for each type.

Customer Reviews

Robert Jackson is the author of over 80 books on military, aviation, naval and scientific subjects. He was defense and science correspondent for a major British newspaper publishing group. His expertise has led to books covering major studies of all aspects of individual campaigns and wars.

This was a Christmas gift for an eight year old helicopter enthusiast. It was his 'early open' present on Christmas Eve when we celebrated with his family. He became so engrossed he didn't want to

open anything else. He tells me a new fact he's learned each time I see him. Great quality book for both adults and those children who are passionate about helicopters.

I'm developing a game about combat helicopters and we have almost every helicopter factfile / encyclopedia book you could find. This one is probably the best. Illustrations are great, profiles and history references are on point, facts correspond with other sources. Great book for anyone interested in helicopter history. This is kind of book I would read for hours when I was a child.

Great book, fun and informative to browse through. I was disappointed that it doesn't include either the AW101 or the S-92 that were in competition for the new "Marine One", but other than that it's pretty comprehensive. I had already purchased "Modern Military Aircraft" that is in the same layout format, so now the two books make a great set.

The book is full of information about helicopters from all countries.

Great book, a good single source reference book about helicopters. Good photos, line drawings, statistics and text.

My 2.5 and 4 year old sons love this book. They are both fav instead with helicopters so this book keeps their interest!

Great

As advertised, on time
