Grade Level: Preschool - 1

Customer Reviews

Erika L. Shores is the author of dozens of children's nonfiction books. She studied English at Concordia College in Moorhead, Minnesota. She lives in North Mankato, Minnesota, with her husband and their two children.

This is the best book on bubbles I have found. It is a great "how to" book and the text and pictures are perfect for my first graders. I use this book several times during the year. I use it during my unit on bubbles (the practice of science), when we learn to write "how to" books and when we learn about text features. This series (Hands-On Science Fun) is fantastic. I highly recommend it for K-2 classes.

This is a great book! Can't wait to make bubbles with my class!

Great book.

Simple text and clear pictures make this a great model text for teaching "how-to" writing in kindergarten.

Great condition!

Great book for teaching How to writing.

Great Book! Easy to follow to!

I purchased three of these books to give to kids for gifts as we all love bubbles in the family:)
