Life And Teaching Of The Masters Of The Far East (6 Volume Set)

Synopsis

ELEVEN MEN embarked upon a journey in 1894 with one objective: ...to find the great spiritual teachers of the Far East and witness their uncommon abilities. Since these Masters were scattered over a wide territory that covered a large portion of India, Tibet, China, and Persia, they knew it could take years of searching many secluded villages and hidden mountain communes. Planning each step of the journey became a challenge knowing that countless miles of rugged terrain separated the remote and isolate locations that were imperative to the exploration. Even though they could plot their route on a map and see where they were headed, the destination deep within the souls of eleven scientifically trained men remained uncertain. Baird T. Spalding and the others were practical in nature and the thought of spiritual masters performing miracles seemed impossible. Despite these suspect thoughts, something compelled them to move onward. So they did.

"The spiritual journey is a journey like no other. Although there is a destination, its direction is not from here to there . . . but rather from without to within." -- MARA MARIN, from Be Still and Know

Baird T. Spalding, whose name became legend in metaphysical circles during the first half of the 20th century, played an important part in introducing to the Western world knowledge of the Masters, who are assisting and guiding the destiny of mankind. Born in England, at age four he went to India. At age seventeen he finished the University and went to California where he stayed two years. He then traveled to Heidelberg, Germany and studied for eight years and then returned to California for post-graduate work in Archaeology at Berkeley and Stanford. After years of working with publisher Douglas DeVorss to write and promote the Life & Teaching series, Spalding died in

1953 in Arizona.

This series of books, along with Autobiography of a Yogi, defined my philosophy in my college years and for the rest of my life..

This volume will enlighten your mind to a whole new world of consciousness. Anyone on a spiritual journey looking for purpose and direction, this needs to be in your collection.

Whether this story is fact or fiction, I believe it is inspired work! There were amazing feats and aha's that kept me engaged, surprised and thrilled throughout the book! As a New Thought student and metaphysician, there is a great deal of Truth principles taught at a deep level, some of which I had to read and re-read to digest. Highly recommended!

While somewhat esoteric for some, it has essential truth that passes the test of time (which is really just an illusion, anyway). I LOVE the series, and find it very uplifting to reread select sentences or paragraphs each day.

I can see how western civilization readers may have a very difficult time accepting Life and Teachings as nothing more than black magic. It goes very deep. This is not a series of books that you sit down and read like the DaVinci code. Have you ever, as an example, opened up the King James version of the New Testament at your hotel room and tried to actually read it and take any of it in? Its tough. Not a page turner. Kind of booooooring. No wonder we have sunday church to get us through it all. Life and Teachings has to be read in small bites people. Really. Yes, there is a message of sorts that comes out of it: Your religion is right. So is your neighbors and so is there neighbors. Yet it doesnt focus so much on "religion" as it does on the human potential. Thats where its at. And, thats where this read keeps going. This is not an easy book series to get through. Dont pick it up and expect "an answer" right away. You have to work a bit. Like a textbook rather than a Dan Brown Novel. It's laughable that people who read about "men that move mountains or part waters etc" can't comprehend it in anything other than magic. Life and Teachings is a thinker series. You read a bit. You stop. You think. Pick it up later and read some more. Not entertaining nor was it meant to be, but it strikes a lightning bolt at a few nerve endings you didnt know you had. And, no, you won't have to send any money to a special group or PO Box at the end. They dont have a Web site either. Baird Spalding is quite dead as are all the other scientists that went into those mountains

in the late 1800's that resulted in this book series. Read it. Don't worry. You won't grow hair on your palms and it won't corrupt your 21st century thinking on modern christianity. The message of Life and Teachings is; Put down your swords. Everyone's right about why we "are". Buddah, Jesus, Allah, Mohammed, everyone of you....YOu all came down the same road from the same hilltop and this is an excellent tutorial on how that could be and examples of the human potential. Its nothing new. No revelations. Millions of years have gone by and its all still the same except on-going arguments.

Enjoyed reading the 6 Volumes. Devoured them quickly. I believe you can read any book in this set and get the message you are intended to learn and grown spiritually from in your own Divine Order. Read them again and you will get a different message. Love and Gratitude.

This is an amazing series which provides universal truths which will awaken you to levels of understanding of the universe we are all a part of. It is transformational in that you will forever view life through a different reference framework and you will find more inner-peace and harmony in all aspects of your life. It is a must to read and to gift to other seekers.

Fascinating. It is hard sometimes to believe is true. I am almost done with the first book and I can't wait to read the other ones. I just regret that so far, Spadling does not tell us how these Masters became masters (what are their practices,...?). Beautiful stories about beautiful god realized beings.
