Customer Reviews

I ordered this just remind myself about basic vocabulary words that sometimes you forget when you are studying Japanese especially if you don't have someone to speak Japanese with this is pretty handy especially if you place it inside of your binder and you can just simply reference back to it and go back and forth and continue studying

It is as colorful as it looks in hand. Each colored section represents a different group of words such as numbers and items in the home. It is very convenient as a way to improve Japanese language study. For example, I've use it to create labels to place on objects for better remembering and when I'm on the go, I can pull this out to review a section. However, I will say there are other items that can do what this does like mobile apps such as Memrise and Kanamind. But, this still works as a companion to the main method of studying Japanese language..

Smaller than expected. I thought I would be getting pages which I could post on the wall for easy reference, however this is a front and back trifold, so my initial plans won't work. Overall, very handy to keep around for quick referencing

My daughter is taking a Japanese course in college. She said she does refer to this often and some of her classmates have borrowed it too.

This is a really great go to guide. It was much more than I expected. I thought it would only be two pages when opened up but there was much more than that (front and back). Overall I am very happy with this purchase.

I bought it because said a lot of people bought this with another item so I thought bundle and save I gave it a 5 because I believe in EDUCATION and it's an easy to read and handy but I noticed one word so far is different than what I'm used to maybe it's me I tried to show you in a review however took it down sorry not trying to get to not buy it I do believe it's worth it but I haven't yet to learn the language fully and am confused by a few words

good buy

Really great and helpful guide to simple japanese words. One thing i would reccommend though is that it have the pronunciation for each word split up into syllables so that you can know exactly how to pronounce each word.
