It had everything I needed and more

JUST AS EXPECTED!!!! THANK YOU

Just brush up on your knowledge of calculating percentages with your calculator (converting to & from decimals), Averages, chart reading (for DUI & Large Vessel Registration Fee Charts & things), Show up to your DMV Exam with a good calculator & the knowledge of how to use it, sit in the front if possible so that you won't be distracted (which means arriving early as state exams are first come, first served line-ups), bring a case of well-sharpened pencils (if your proctor sends you word in advance that you will need them), structure your time well, answering easy sections first, & returning to harder ones later, Be sure you go well-fed & with drinking water, & after a restroom break, so you

do not have to leave the room for any reason. Think each question through, and in most cases 2 answers seem to be potentially correct, and it will be up to you to discern the most logical response. In the end, to place in the state exam rankings, you will find that in many cases, there usually was only one best answer anyway, and you just had to read the wording carefully in order to find it. Good luck... By the way, I took the exam after buying this book though the questions were completely different, and I did place in the California State rankings for the D.M.V, but due to the Governor's State budget cuts, he imposed a hiring freeze which barred all applicants from obtaining employment opportunities! Anyhow, good luck to you, and remember: common sense, basic reading ability, & a good calculator will get you through just fine!

I would give a "no-star" rating if it was possible. Nothing like the exam. There are so many misprints in this book that I really believe no one proofed it before sending it to press. They will give you a problem and then none of the four answers will even be a correct choice! This happened numerous times. This is very frustrating for a person who is trying to remember old math skills and wasted much of my study time.
