"My family and I are having such a good time making these airplanes and flying them. My daughter is in love with this book. She wants to make a new airplane on a daily basis! This book is very easy to use and understand. The different projects and planes are so cool and inventive. I would absolutely recommend it to anyone." – Mom Does It All blog

Andrew Dewar was born in Toronto, Ontario, and graduated from Ryerson Polytechnic Institute (B.A. Journalism) and University of Toronto (M.A. Japanese Studies, Library and Information Science) before moving to Japan in 1988. After completing his doctoral studies in library science at Keio University, he joined the faculty of a junior college in Japan. Soon after arriving in Japan he rediscovered his childhood love of designing and flying paper airplanes. His passion for paper airplanes led him to become president of the Fukushima Paper Airplane Club. Dewar has published over 30 paper crafting books and kits. He also teaches paper airplane workshops and does seminars at schools, libraries, community centers and museums. He lived and taught library science in Fukushima, Japan, until the giant earthquake and nuclear accident in March 2011, when the city became unsafe. After a brief stay in Canada, he's returned with his family to Gifu, Japan.

I ordered this book for my 10 year old nephew. He had asked for an origami airplane book or kit for his birthday. He loved it! Besides the big hug we received after he opened the present, he immediately started folding papers to create the airplanes. The book includes many colorful & decorative sheets for airplanes, more than I expected, and the airplanes flew easily across the room. My nephew didn't seem to have any trouble folding the planes. He was able to construct all of them by himself.

This is a really cool book. I would say it's geared towards older kids (think 10+). Younger children would benefit from supervision and assistance. But overall a great product that has the potential to yield really cool paper airplanes.

Wow, Easy for whom? Certainly not for me let alone my 4 yr old grandson! Maybe I'll wait until he becomes an origami master to give him the book. The variety of papers are colorful and nice but trying to figure out how to turn them into the airplanes described was beyond me.

Have previously bought different paper plane books and can say this purchase was poor in comparison. Paper too small and some instructions unclear.

Got this for my son for Christmas. He loved making paper airplanes before, on his own. He just loves the instructions and being able to make all different kinds.

ordered this book along with 2 others for my 7 year old's birthday, he enjoyed this book all summer, highly recommend

I got this book for my grandson for Christmas. He was thrilled with it. He make airplanes with his Dad all the time.

A great idea that flops badly. Even the paper size works against successful flights. Save your money and read the reviews first.
