# Star Force: Origin Series Box Set (1-4) (Star Force Universe)

## Synopsis

\*\*\*The Star Force Universe has over 15 million KU pages read to date.\*\*\*The discovery of an ancient alien pyramid buried under the ice in Antarctica changes Earth forever. We learn that we are the forgotten slaves of a galaxy spanning empire called the V'kit'no'sat who abandoned our planet 100,000 years ago during a massive rebellion. Our ancestors, the Zen'zat, were given special genetic powers and ordered never to reproduce under pain of death...for themselves and their offspring. That means Earth's entire population is illegal and if the V'kit'no'sat return to reclaim their lost border colony they'll wipe out every last one of us. And they can do it easily, for their technology and psionic powers are insane. Earth has to find a way to fight back, and the corporation that discovered the pyramid does not turn it over to United Nations or any other government. Rather, the CEO spawns a new corporation called Star Force, funded from the new technologies derived from the pyramid, and publically proclaims its mandate is to facilitate the colonization of space. In reality it's purpose is to prepare Earth for the V'kit'no'sat's return. In order to do that we have to create spaceships, mechs, aquatic warships, aerial craft, and armored super soldiers all the while seeking to unlock the dormant genetic superpowers our ancestors left us. And to lead them all, 100 carefully selected individuals from across the planet are chosen to undergo the most advanced combat training we can provide them...and after that, we're taking orders from them as they try to figure out a way to beat an unbeatable enemy without knowing how much time they have to do it.---

\*Reader Reviews for Star Force\*

"Author is an absolutely AMAZING storyteller..."

"A great series, this is my favourite syfy series."

"This storyline pulled in immediately. Different in so many ways, not your typical space opera or action adventure."

"Out of all the series I read Star Force is the only one that I feel really captures the sheer scale of interplanetary, and interstellar space. If you want to see the way humanity grows from a single planet civilization fighting to survive in a galaxy filled with threats to a massive alliance of thousands of races fighting enormous battles in space, in the air, on the ground, and in the oceans, then this series is for you."

"It's like Robert A. Heinlein's stole a draft from Asimov, the publisher is Frank Herbert and the editor H.G. Wells'. One of the best series i have read, gives the feeling of the old known Sci-fi writers. the only problem is that you'll get addicted.... Highly recommended"

"Well..i am caught up...i have read all 100 SF episodes and the first of the Wayward series..and i want to fast forward the clock until the rest are ready to read! I have read Science fiction from the age of 5 until today..so 48 years of voracious reading ...and its rare for me to look forwards to more in a series like i am with SF."

"I bought the first book to try it out and immediately bought 2,3,4 and the rest as I finished each one as im addicted to the story now and cant wait for the next installment. I would recommend it to any science fiction reader as the best series ive read

in years." "If you like military SF, this one is on the same level of all the best; probably better for the plot and leading characters keep evolving, keeping you hooked up. I've read all the books in little less than 4 weeks...Simply the best series i've read in the last 5 years. Congrats Are-ki Jyr!!!" "Time flies. Still religiously buy them as soon as they are published. I take back what I said about this not being a Masterpiece. If he Finishes this, it will be." ---Genres: science fiction, space opera, galactic empire, space team, space war, military science fiction, dinosaurs, young adult, starship, action, adventure

## **Customer Reviews**

The concept is interesting but the book got bogged down in the details of buildings, spaceports and training.I understand the concepts of teaching the trainees to think and work together.At this speed, this series could outlive me.

I chose this rating because it didn't stoop to crude language and tastefully presented the story in

such a way as to keep my interest up.

I bought the first series (books 1 - 4). It had an interesting beginning - advanced technology from an ancient race found under the ice in Antarctica. From there on the author uses so much detail describing each training exercise, each conversation, and each daily routine of the recruits, I could not get through it. One example, he spent at least two chapters describing a paint ball exercise. I found myself skipping paragraph after paragraph trying to get through it. It appears that by the end of the 4th book the recruits are still in training. I gave up. I will not be buying any more of this series, fearing I will drown in the minutiae.

What was all the training for? What was the purpose of bringing up the existence of the dinosaurs if they weren't being mentioned again? I'd give this book a 2star rating. Too much emphases and detail on training. Not enough on character development or story.

Great story. Read all 100 of the series and I'm still reading.

I could see this story being translated into a weekly TV series. Are-ki Jar has set up an epic sci-fi story with this first box set of four books. What matters with books like this? It's that you want to read the next in the series just to see what happens next. I definitely want to do that.

Liked it

I would say that I have read lots of diverse Science Fiction and Fantasy through my years as and avid reader. Here is the deal Star Force is the culmination of all the things I have enjoyed giving you a taste of everything in those genres and more. If you like an expansive look at World building...even Universe building than this is the series to set your claws into. Realism when it comes to Technology with very distinct ideologies unique to the Author. If you want Jedi/Spartan Super Soldiers who live indefinitely that can kick ass and take names later you don't have to look any further than the Archons. These guys are epic and masters of all trades. You need an admiral here you go, you need a field commander, a pilot, and many other jobs they fill no task is to small or to great. If you take Stargate/Star Wars/Star Trek and Halo mixed in with some Jurassic Park this is what you get.
