# Lecture Notes On Mathematical Olympiad Courses: For Senior Section (in 2 Volumes)

## **Synopsis**

Olympiad mathematics is not a collection of techniques of solving mathematical problems but a system for advancing mathematical education. This book is based on the lecture notes of the mathematical Olympiad training courses conducted by the author in Singapore. Its scope and depth not only covers and beyond the usual syllabus, but introduces a variety of concepts and methods in modern mathematics as well. In each lecture, the concepts, theories and methods are taken as the core. The examples serve to explain and enrich their intentions and to indicate their applications. Besides, appropriate number of test questions is available for the readers' practice and testing purpose. Their detailed solutions are also conveniently provided. The examples are not very complicated so readers can easily understand. There are many real competition questions included which students can use to verify their abilities. These test questions originate from many countries all over the world. This book will serve as a useful textbook of mathematical Olympiad courses, a self-study lecture notes for students, or as a reference book for related teachers and researchers.

## **Book Information**

Series: Mathematical Olympiad (Book 8)

Paperback: 528 pages

Publisher: World Scientific Publishing Company (March 23, 2012)

Language: English

ISBN-10: 9814368946

ISBN-13: 978-9814368940

Product Dimensions: 6 x 1.2 x 9 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars 1 customer review

Best Sellers Rank: #1,967,084 in Books (See Top 100 in Books) #89 in Books > Science & Math > Mathematics > Research #403 in Books > Science & Math > Mathematics > Reference #1014 in Books > Science & Math > Mathematics > Applied > Differential Equations

## **Customer Reviews**
