Customer Reviews

Scott Sundby is the author of *Cut Down to Size at High Noon*. Wayne Geehan, a graduate of the Art Institute of Boston, has been illustrating books, board games, and jigsaw puzzles for over twenty years. When he isn't painting in his Massachusetts studio, he enjoys being with his family, reading, and researching his family's genealogy.

great for math introduction

Great book for my middle school classroom. I bought two and used them at centers with activities. This book helped support our school goal of using literature in all content areas!

I ordered this book to use with my 7th grade math class on scale factor. They loved it. I found a worksheet that corresponded with it online.

Great book for introducing the concept of scale drawings. A very dramatic reading keeps the students on the edges of their seat, even in the 7th grade.

I will say this is one of the most silliest books I have read. It is about two barbers who cut hair and make all sorts of designs. They set up shop and find themselves in a conflict. Small towns are small and there is just not enough room for the two of them. As they battle it out, they realize that they can work together as they each offer something different and unique. In addition to this being a very silly book that kids will just enjoy, I think this is a great way to introduce the concept of ratios and scale. This book has a few diagrams that will help teach children in a fun way.

I purchased this book for my 6th grade math class. We were covering scale and ratios and I thought this book would help with understanding. When I read the story to the class, they were extremely eager to see each scale creation. The class thoroughly enjoyed the book and there was no doubt about what increase and decrease in scale meant!

This book works great for my 7th and 8th grade classes. The kids love the story and it was the perfect first time for them to practice scale factor.
