Faith And Science In A Skeptical Age

Synopsis

People remain thankful for science, but they also recognize that science does not hold all the answers. In fact, they see that science can raise more questions than it answers, driving people on further quests for understanding truth, and contentment. *Faith and Science in a Skeptical Age* shows Christians how to respond to a world focused on finding answers to life's mysteries by exploring current topics and their impacts on our culture. Topics covered include: Heaven and hell Near-death experiences Angels Demons Miracles Alien exploration Stem cell research Cloning, and more. *Faith and Science in a Skeptical Age* is a companion to our *Faith on the Edge* Bible study series.

Customer Reviews

Dr. Jesse Yow works in applied science and technology and manages environmental restoration programs at Lawrence Livermore National Laboratory. He also writes for Concordia Publishing House and World News Group, serves on the LCMS Commission on Theology and Church Relations, and teaches Bible classes at Our Savior Lutheran Ministries in Livermore, CA.

A helpful study for the layman; the book explains the limits of science and clearly teaches confessional Lutheranism.

Putting faith in the Creation of a loving, saving God and not the scientific imaginations of man.

O absolutely hated it... This book is not written for the Christian in mind. It seems its science or your faith in God. It discusses science like an obnoxious soar. With statements like: The skeptics and critics have not understood the persistence of Christianity because they have not understood the person of Jesus Christ. Man has created "science" as a definition to understand things like the sun for instance. We use the elements we find on earth and wrap them in a man's definition of understanding when God created simply with His almighty breath. The sun just like the moon is not made of anything we have here on earth but science sure tries to use it to define everything... Man hasn't been past any solar system to know it exists, but the word science is man's clumsy expression of being "like-god"... science doesn't know anything. God created heaven and earth and that's IT! Man's ego can show pretty drawings and cgi and say "Science CAN" with all the authority he can muster... but its a deception. God breathed the heavens into existence... just like your Bible tells you GOD made heavens and the earth.... man tries to fill in the blanks. Don't let him, aka science!! Do not buy this book. There is nothing you will learn from it. Stay away from anything that has "faith" & "science" in the same sentence. I am recently rereading all my books in my library... Go for How We Got the Bible by Neil R Lightfoot instead.
