Age Range: 4 and up

Grade Level: Preschool and up

Customer Reviews

School Zone Publishing Company began as The School Zone Learning Center in 1972. The Learning Center was a retail teachers supply outlet, specializing in sales to teachers, with two stores in Grand Rapids, Michigan. About 1974, schools instituted changes in educational methods that affected the home and schools. Changes included introducing new teaching methods in math and English and eliminating workbooks provided on a shared basis for home use. With these changes, parents experienced difficulty finding educational material for use at home. Local parents turned to the Learning Centers, requesting workbooks and other at-home teaching aids. In response, the Centers formulated six workbooks and printed 1,000 copies of each. The books sold out in six months. An expanded workbook series was developed and received equally enthusiastic acceptance. School Zone Publishing Company was incorporated in 1979. A new line of workbooks had been written and illustrated by late 1979. In January 1980, the line was printed and School Zone began operations. Market response was extremely favorable. The product line has expanded yearly and currently includes over two hundred educational products.

I put the pages into plastic sleeves and my grandkids use magic markers to connect the dots. I wipe the pages clean with alcohol, and they pull out the binder and do them again next visit. These have nice color and graduated numbers (1-5, 1-10, etc.): the pictures are great. Wish there was a number line at the top of each page to help the younger ones learn: I put one there. The pages could be heavier: bit of a see-through; however, then it would have cost more of course!

This is a well made book - the pages are heavier than I expected for the price, and the illustrations are quite good. The book actually starts with pictures with only 10 numbered dots, then goes to 15, to 20, and finally to 25. Useful if your child is only learning to count, but I would have preferred all 1-25 since that's the title of the book. I laminated the pages so we can use dry-erase markers and use them multiple times; otherwise the book would have been used up very quickly.

For struggling kindergarten & 1st graders, this type of book is extremely helpful for the skill, plus sequencing and taking time to think about the next step. The closest dot is not always the next dot. We love these activity books with our students. They beg for them.

Dot-to-dots are great for learning how to count. I've bought this book already once, for my older son. This purchase was for my younger one. The book starts with 1-10 dot-to-dot, and gradually goes all the way to the number 25. I gladly recommend this book.

EXACTLY AS DESCRIBED - SWIFT DELIVERY - AWESOME

Great learning tool. My daughter loves it!

My 5 year old granddaughter very happy with the dots-to-dots book.

These books are great to have on hand when I need to keep my little one busy. Simple enough for my girl to work on with little instruction, and a great opportunity for her to practice her numbers and pencil grip. You can't beat the price!
