Listen! The Wind.

Synopsis

This lovely 276 page collector's edition (privately published by Westvaco, 1990) of Anne Morrow Lindbergh's classic "Listen The Wind" is the story of a survey flight around the North Atlantic Ocean in 1933. It is a true and accurate account of various incidents which occurred in flying from Africa to South America. The purpose of the flight was to study the air-routes between America and Europe. At that time, the air-routes of the world were entering their final stage of development. The countries had already been crossed and the continents connected. It remained only for the oceans to be spanned. Their great over-water distances constituted the last major barrier to the commerce of air.

Anne Morrow traces the last few days, including a long-range Atlantic crossing of she and Charles' 1933 Survey flight. She gives the reader some perceptive first-hand impressions of the out of the way places they travelled to, places few had been to at that time, and not many have been to since. Eventually, more modern aircraft made the harbors they operated out of, redundant. The book reads like something from National Geographic and must have been an eye opener for readers of the day. It was particularly fun to read about Anne's lessons in radio operation and her efforts to

master the Morse Code. A fine follow up to North to the Orient, my only criticism is that it didn't cover their entire European journey.

Great old book in perfect condition.

I was overwhelmed at the quality of this book. It was in its own case and had a matching name plate. I will treasure this book. Thank you!

Bought this for my mother--she has enjoyed reading it, and I plan to this summer--it is true, behind every famous man is an even more AMAZING woman who supports him!

How amazing it was to see the way that early flyers navigated and flew without adequate information of the area or the weather conditions

Great first person narrative of historic events

Delivered as advertised.

She can paint a picture in your mind with words.
