Naval Shiphandler's Guide (Blue And Gold)

Synopsis

The first new book on naval shiphandling in more than a generation, this guide helps beginning and intermediate shiphandlers learn and perfect a skill crucial to their naval careers while at the same time offering useful hints to seasoned pros. The book reflects all the many changes that have occurred in recent decades and is the first to cover the use of shiphandling simulators. The author, a skilled shiphandler with years of experience in nearly every type of Navy vessel, helps novice shiphandlers get the most out of their opportunities, whether handling real ships or simulators. Captain Barber tells readers everything they need to know about forces acting on the ship, getting underway, making a landing, transiting the channel, and underway replenishment. Standard commands for both ships and tugs are included, along with needed information on the use of tugs and pilots. Voyage planning, emergency shiphandling, tactical maneuvering, and more are covered in detail. A chapter is devoted to the special shiphandling characteristics of various classes of naval vessels. An introduction to the Rules of the Road is provided in an appendix.

Customer Reviews

this was a great read and helpful in learning how to navigate a ship.

Outstanding use of full scenarios that is much more useful to junior officers than previous guides.

Best and probably the only real modern book for SWOs out there. If you are working on qualifications, this is the book to have.

No complaints at all about the content of this book. In addition to a review of basic shiphandling (orders, forces, etc), this book delves into the physics of a ship's movement and more advanced maneuvering.

A definitive text. One of only two books on modern shiphandling for the Naval Officer. Every officer involved in shiphandling should study it thoroughly and often.

Naval Shiphandler's Guide (Blue and Gold)This is an excellent book from a gentleman who, in less than 5 minutes without a tug, parallel parked his 550' ship like his Green Triumph TR6 in a small parking space; quickly, accurately, professionally and to the amazement of all hands aboard the Horne and the line handlers on the pier. What sailor can blame him with a beautiful lady waiting on the pier in Hawaii for her father's hug?Finally he puts onto paper what he taught onboard his ship 20 years earlier, I did not even get past the first paragraph before I started to recognize his shiphandling lectures.
