## Synopsis

If you could make \$5,000 to \$10,000 per month on eBay, or Etsy in the next six months, would you? Using my simple system for sourcing the hottest products and making the most profit, your bottom line will soar - it will climb each month, as more buyers find your listing! Here's the simple formula you will learn to master: Giant Product Source + Right Product + Large Daily Sales = \$5 - \$10,000 Plus/Month! Imagine an online portal that houses over 35,000,000 wholesale products and is inviting you to get your hands on them for resale on eBay, , Etsy and other online sites and store fronts. This site is loaded with an incredible variety of low cost and quality products. How do you explore this ocean safely and not get eaten by the sharks? Chatter abounded for years on the internet how this Chinese source (Alibaba) and others like it, could not be trusted: stories of resellers getting stuck with cheap and inferior products, not receiving products, not getting what they ordered, not being able to return bad products and the list goes on, were everywhere. Are these stories true? While the chatter continues to this day, many of the Power Sellers on eBay, and Etsy are sourcing from Alibaba and similar sites and making millions. Do they know something that others don't know? Yes they do, and I'm going to teach you what that is! In this book I will show you how to: Safely source products from Alibaba and AliExpress What products to buy and what not to buy How to identify trustworthy suppliers How to brand yourself so you get higher search rankings How to go inside eBay and to determine the most searched and best selling products so you can zero in on what works The only way to safely pay for products What products to sell and not to sell and why How to find good products How to evaluate products How to buy samples What price range to stay in and why How to prevent excessive freight charges How to find trending and new products and why these are key to your success Did you know that most of the Power Sellers on eBay and source many and sometimes all of their products from Alibaba. When you walk into any big box store and look at the product labels, what do you see? Made in China If most products are made there, why aren't you sourcing directly from China? There is no better home business opportunity and no better time than now, to take advantage of this system. Even if you just want to make some extra money or cash while working from home, this system is for you. ## Customer Reviews

When I first got into internet marketing quite a few years ago, one of the main things that I did was get into selling on ebay and other merchant sites. I later felt that the markets became saturated and stopped doing this after awhile but have heard some good things about leveraging Alibaba recently so set out to explore this further. This is, by far, the best guide that I have found to using the Alibaba and AliExpress websites to make money on U.S. sites like Ebay, and Etsy. Valuable information here on which products to search out, how to research hot products, protecting your money in foreign purchases, dealing with freight, and evaluating products. By following simple directions you will learn how to source great products on Alibaba that will have wide appeal on eBay, and Etsy.

All I can say is when you open this book and start to read it get prepared for a full sprint of great information provided by Sam Sommer. If I could have given this book a 6 star review, I certainly would have done it. This book is loaded with fantastic information and websites to help you find great products to brand. The author does a great job of breaking down the inner workings of Alibaba and AliExpress and the benefits of each one. Some of the most useful information for me was the way he layed out the criteria for picking a winning product to sell. The secure payment information provided was invaluable in a world where people sometimes try to take advantage of the rookies in

the business. I like the connection and relationship he uses to show product crossovers in Ebay and the tool used to verify big sellers on . Great explanations on the Wholesale site of Alibaba and Alisource Pro. Great book for a great price. Sam Sommer certainly knows Alibaba.

Thank you for this super item and quick service!

Fast read, easy to understand, and quick to the point. This ebook could go more in depth on product search, but does cover the basics of operating the site safely.

great book a ton of interesting details explained thank you author of this book

This was a fast and easy read; however, the author dropped some helpful tips and tricks!! I would definitely recommend this book!
