Discovering The Life Span (4th Edition)

Synopsis

For courses in Lifespan Development – A modular, manageable, meaningful survey of the life span. Discovering the Life Span provides a broad overview of the entire range of the human life, from the moment of conception through death. Utilizing a flexible, modular organization, author Robert Feldman covers the life span chronologically and focuses on physical, cognitive, and social and personality development within each stage of life. Feldman's engaging and accessible writing style makes the material meaningful to students, and prepares them to apply content to their personal and future professional lives. In order to provide an up-to-date snapshot of the discipline, the Fourth Edition includes hundreds of new citations as well as coverage of a number of engaging contemporary topics. Available to package with Discovering the Life Span, Fourth Edition, MyLab Psychology is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. MyLab Psychology is ideal for courses requiring robust assessments. Discovering the Life Span, Fourth Edition, is also available via Revel, an interactive digital learning environment that replaces the print textbook, enabling students to read, practice, and study in one continuous experience. Revel is ideal for courses where student engagement and mobile access are important. Note: You are purchasing a standalone product; MyLab does not come packaged with this content. Robert S. Feldman is Professor of Psychological and Brain Sciences and Deputy Chancellor of the University of Massachusetts Amherst. He has also served as Dean of the College of Social and Behavioral Sciences and is currently serving as Interim Dean of the College of Education at the University of Massachusetts. A recipient of the College Distinguished Teacher Award, he teaches classes ranging in size from 10 to nearly 500 students. During the course of more than two decades as a college instructor, he has taught both undergraduate and graduate courses at Mount Holyoke College, Wesleyan University, and Virginia Commonwealth University in addition to the University of Massachusetts Amherst. A Fellow of the American Psychological Association, American Association for the Advancement of Science, and the Association for Psychological Science, Professor Feldman received a B.A. with High Honors from Wesleyan University (and from which he received the Distinguished Alumni Award). He has an MS and Ph.D. from the University of Wisconsin-Madison. He is a winner of a Fulbright Senior Research Scholar and Lecturer award, and he has written more than 200 books, book chapters, and scientific articles. He has edited *Development of Nonverbal Behavior in Children* and *Applications of Nonverbal Behavioral Theory and Research* and co-edited *Fundamentals of Nonverbal Behavior*. He is also author of *Development Across the Life Span*, *Understanding Psychology*, and *P.O.W.E.R. Learning: Strategies for Success in College and Life*. His books have been translated into many languages, including Spanish, French, Portuguese, Dutch, Chinese, Korean, German, Arabic, Tagalog, and Japanese, and more than 2.5 million students have used his textbooks. Professor Feldman's research interests include honesty and deception in everyday life, work that he described in *The Liar in Your Life*, a trade book published in 2009. His research has been supported by grants from the National Institute of Mental Health and the National Institute on Disabilities and Rehabilitation Research. He is also past president of the Federation of Associations in the Behavioral and Brain Sciences Foundation, an organization that promotes the social sciences, a member of the Board of the Social Psychology Network, and is a member of the Board and Executive Committee of New England Public Radio. Professor Feldman loves music, is an enthusiastic pianist, and enjoys cooking and traveling. He has three children and four grandchildren. He and his wife, a psychologist, live in western Massachusetts in a home overlooking the Holyoke Mountain Range.

Received the book promptly but the corner of the cover page was gone, few pages within the chapters were gone as well. the textbook is somewhat in good condition considering I'm only using it for 6 weeks but the corners were really worn out and folded when I received it. Overall for the price of the rental, i think it was worth it. you just have to be careful and see if you got a book that has all the pages intact. I had trouble finding the topics that were going to be on my exam until I looked at the page numbers then realized the pages I needed were nonexistent (I assume they were ripped out).

Perfect. It was a text book, I rented it in good shape, got it on time. It is a well written book for a psychology class.

I did receive the book that i needed and payed for but nowhere did it say in the description that the book i had bought was damaged. Most of the first pages in the book were all crinkly meaning that they had been wet and you could clearly see it. And they most definitely were not wet with water.... It clearly smells like pee! My cat wouldn't stop sniffing it so I had to smell it to check what it was. It's honestly so disgusting. A book like that should not be worth \$40!

I only gave one star because it's the right book.. other than that it's crap. Chapters are ripped out of the book, there's writing all over it, I don't know how the binding hasn't fallen completely apart but it's getting there. There is no way I'll be able to study with this crap and it deff wasn't worth the money.. and I can't find any where to attempt to contact the renter to exchange it..

For the price I paid, and acceptable condition this is worth it. The cover is worn and some pages are a bit loose but it's fine it's just the title pages. Practically zero writing and highlights, I saw a little pencil but that's easily removable.

Excellent learning tool!

Course required reading. Good condition.

I wasn't looking for something fancy, and it has been working pretty well so far. I can't think of any issue.
