Explorations In Basic Biology (12th Edition)

Synopsis

Explorations in Basic Biology is a self-contained laboratory manual designed for one- or two-semester introductory biology courses for non-biology and mixed biology majors. The exercises are appropriate for three-hour laboratory sessions, but are also adaptable to a two-hour laboratory format. ã ã Ideal for students with little hands-on science laboratory experience, this student-friendly text provides clear background information and directions for conducting laboratory activities. Students not only learn basic biological information but also gain experience practicing laboratory techniques. ã ã The Twelfth Edition has been updated with new content, including several new or modified figures and procedures that have been clarified wherever necessary to facilitate student learning, a new Appendix, and guidelines for writing a scientific paper. Several exercises also feature significant improvements.

Book Information

Paperback: 544 pages

Publisher: Pearson; 12 edition (February 21, 2011)

Language: English

ISBN-10: 0321722949

ISBN-13: 978-0321722942

Product Dimensions: 8.4 x 0.9 x 10.8 inches

Customer Reviews

After earning his Ph.D. in Biology at the University of Southern California, Stanley Gunstream became the Co-Principal Investigator for USC's Mosquito Research Project. Stan is now retired after 34 years with Pasadena City College, where he began as an Associate Professor of Life Sciences and progressed to the Chair of Life Sciences/Allied Health, Administrative Dean for Instruction, and Vice President for Instruction. Stan has also served part-time as a lecturer in Ecology and Entomology at Pasadena College and CSU-Los Angeles. ã ã He is a member of the Human Anatomy and Physiology Society (HAPS) as well as the National Association of Biology Teachers (NABT). Stan is the author and co-author of seven anatomy & physiology and biology

laboratory manuals, and one anatomy & physiology textbook.

I would just buy from a bookstore the next time. Needed some codes for somethings that didn't have

Ordered the book for my Bio 100 class because I needed the labs and didn't want to spend money to make copies at the library. When I got the rental, a lot of the labs were missing and the ones that were left were already finished and the person wrote in pen.

I received this book as a rental and all the lab reports were torn out. The book is of no use to me without the lab reports. I had planned on making copies of the lab reports to submit to my instructor since the book was rented and I couldn't tear them out to hand them in. Well, being they aren't there at all, I can't even do that! I am very disappointed!

This lab book was missing lots of pages out of it. Had to return it and order another one electronically!!! Huge inconvenience.

This book was missing one of the labs that I needed. Don't rent it because it might not come with all the pages. A brand new purchase is better.

Book was written in. Banged up pretty badly. Didn't really suit my needs

I am renting a textbook and expect a complete book, but this is missing half of the pages and is written and highlighted all over.

Some of the labs were missing
