Realistic Bug Out Bag

Synopsis

Realistic Bug Out Bag by Max Cooper sets itself apart from many other similar books. This book covers the reality of bug out bags. Too many people solely focus on loading up their bag until the zippers are about to rip apart. Their bags are too full and way too heavy to travel on foot. You cannot assume that in a bug out situation you will be able to use your 4x4 and travel to your bug out location. Chances are gridlock or other road conditions will render your vehicle useless. You may have to travel on foot and you must have a bug out bag that you can realistically carry. Yet, many people have never stepped outside the comfort of their home and carried their bug out bag on their back. For these unprepared individuals failure is a very real reality. Realistic Bug Out Bag covers aspects that you need to know in order to bug out including a very useful “Bug Out Bag Assessment” which will provide you a good idea of how prepared you are to immediately bug out. This book is not about lists although some lists are included. It is about your decision making ability to know and understand the cost/benefit ratio of every piece of equipment that you decide to put into your bug out bag. Way too many individuals have their bug out bag stored in their home incorrectly believe that they are ready to bug out but they are not. Read Realistic Bug Out Bag to find out why you are more than likely not prepared to bug out and how you can remedy your situation. Finding out that you are not adequately prepared during a bug out event is a preventable failure this book is the prevention! This is a must have book for your preparedness resource library.

I got this for a reference to update my own bag. I still have all of the basic items, but there were some items that were good suggestions for additions to a bag. This was use full for me and may prove to be a great help for those that have not put a bug out bag together in the past. The book provides a very good basic knowledge on how to stuff your bag.

Great book! Good to finally see an author who gets it, I bought the book as I like to see the differences on philosophy, max cooper and I are definatly on the same page. He's inspired me to write my own book....lol. Awesome job Mr. Cooper, my boonie hat is off to you good sir...

So many useful suggestions for equipment - a number of products the average joe (like myself) would have never have known about. Also provides the strategy of what to pack for a practical bug out bag. Bonus - thought provoking discussions about what to do for different emergencies.

This is a very good book and is exactly as described "a realistic bug out bag". It covers all the bases without the tacticoool baloney. Take this book and taylor to your specific needs and location and your pretty well good to go.

Excellent book. Covered much more information than I had expected. Highly recommended for anyone setting up their own bug out bag.

A realistic view on how to plan and undertake how to prepare for a disaster scenario and what to put into a bag to be able to live through it.

I highly recommend this book for people who want to make any type of pack for outdoor or survival needs. For beginners this pretty much sums it up for advanced you can pick up tidbits here and there.

Well written. Mr. Cooper gives great advice without outrageous information other emergency information authors try to pawn.
